***BREASTFEEDING INSTRUCTIONS***

Patient's Name \_\_\_\_\_

Date: \_\_\_\_\_

Please follow the instructions that have been checked below. For those instructions that indicate an interruption in breastfeeding, the milk should be discarded if expressed during that time. In addition, the breast pump may be cleaned following normal cleaning procedures. Any questions should be directed to Dr. Lam at 254 288 8290.

☐ No interruption of breastfeeding is necessary after this procedure.

☐ Breastfeeding should be interrupted for \_\_\_\_\_ following this procedure. After that time, breastfeeding may be resumed without any further precautions. Following this recommendation will avoid unnecessary radiation exposure to your infant or child from breastfeeding.

☐ Breastfeeding should be interrupted for \_\_\_\_\_ following this procedure. After that time, breastfeeding may be resumed without any further precautions. Failure to discontinue breastfeeding after this procedure may harm your infant or child's thyroid.

☐ Breastfeeding should not be resumed following this procedure. This only applies to this infant or child (i.e., future children may be breastfed). Failure to discontinue breastfeeding after this procedure may harm your infant or child's thyroid.
